

Music

When people look at sunflowers they often make them happy. What songs make you happy? Can you practice your favourite at home and share it with your friends at school?

In science we will be growing our own sunflowers. Can you grow something different at home and record a diary of how it grows? What does it need to grow and stay alive?

Science

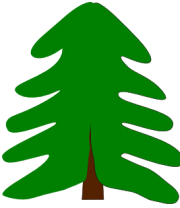

Writing

Can you write a quiz about plants for your family? What questions could you ask? Make sure you know the answer so that you can see if they are right! How many did they get right?

Outdoors

Be a nature detective! Go on a spring walk and see how many living things you can name. Can you take photos or sketch what you have seen?

Term 5
Sunflowers

Keep practising your times tables and remember to log on to My Maths to find your maths homework.

Numbers

Can you make a simple bird feeder to feed the birds in the garden. Can you use recycled or natural materials to make it? Try and take a picture of it hanging in the garden and see if you can spot a bird eating from it.

Crafts

<http://www.firstschoolyears.com/science/living/interactive/growing-plants.swf> Can you help Sparky learn all about plants by playing the mini games?

ICT

Art

Explore your garden, the local park or even the beach. See what flowers or living things you can see. Can you sketch them including as much detail as you can?

This term our learning is based around 'Sunflowers'. We will however be continuing with some of our Marvellous Meerkat learning for the first few weeks. Please choose one activity a week as homework for your child. Homework will be sent out on a Friday and collected on Thursday. Have Fun!

Mrs Clemo, Mrs Kyle and Mrs Willis.
