

Websites that have useful Maths games you can enjoy with your child at home

<http://www.bbc.co.uk/education>

BBC Bitesize - Once you have selected your Key Stage you are able to select the area of maths learning you would like to practice.

<http://mathszone.co.uk/>

Maths Zone - All areas of maths can be found at the tab and tabs can be selected in order to select appropriate games for your child.

<http://www.crickweb.co.uk/>

Full of games that support children's learning of maths.

<http://www.topmarks.co.uk/maths-games/>

You can select the age range for your child and then select a range of games for each area of mathematics.

<http://www.ictgames.com/>

A variety of fun and interactive games targeted at all areas of maths and a variety of age ranges. (Suitable for KS1 and beginning of KS2).

All of these websites offer a variety of different games, these can be used to reinforce learning from that week or used to practice areas that your child may find difficult. If there is one area that your child particularly struggles with you can find a variety of games with the same purpose on the different sites to keep learning interesting.
